

Environment, Health and Safety Policy

Enbridge Inc. is committed to the protection of the health and safety of our employees and the general public, and to sound environmental stewardship. We believe that prevention of accidents and injuries and protection of the environment benefits everyone, and delivers increased value to our shareholders, customers and employees.

Our goal is to have no accidents and to cause no harm to the environment. To achieve this, we will:

- consult openly with our customers, neighbours, employees and partners, work with our regulators, industry peers, and other partners to promote responsible environmental, health and safety performance,
- strive for continuous improvement, with all Enbridge operations establishing business-specific policies compatible with this policy, setting measurable targets, and reporting on performance.

This commitment is a shared responsibility involving the corporation, our subsidiaries, employees and contractors. To this end:

- Enbridge will conduct business in a manner that recognizes health and safety management as an integral part of our activities, and that promotes pollution prevention and resource conservation to achieve environmental sustainability.
- Employees are responsible for conducting their activities in a manner that makes health, safety and environmental management a primary part of their daily activities.

A handwritten signature in black ink, appearing to read 'P. Daniel', with a long horizontal flourish underneath.

Patrick D. Daniel
President & Chief Executive Officer

- Social
- CSR Policies
- CSR Reports

Enbridge's commitment and approach to corporate social responsibility (CSR) is summarized in our Corporate Social Responsibility Policy.

Three other policies provide direction for specific activities that are part of corporate social responsibility.

- Enbridge has implemented a company-wide **Environment, Health and Safety Policy** and each of our business units have Environment, Health and Safety policies that are appropriate to their specific operations.

Climate change is an important environmental concern for Enbridge. Our Climate Change Policy, developed by the Enbridge Climate Change Task Force, articulates our corporate framework for managing greenhouse gas emissions.

- Enbridge's **Aboriginal and Native American Policy** guides the nature and scope of our relationships with Aboriginal and Native American peoples wherever we interact with them. The policy helps to set consistent practices and provides guidance for project teams and business units.
